١

① In the USB device, copy the upgrade file from the computer, after decompressing the file put the ISPBOOOT.BIN and OSU\_Settings folder or update file in the root directory of the U disk;

습 USB Media

Kì

②Insert the USB, return to the main interface→Settings→Version Information→About Device→Update→Click the corresponding file to upgrade→Upgrade (during the upgrade process, the USB cannot be pulled out, and the USB will be automatically read after the upgrade is completed)

The upgrade process cannot be powered off, pay attention to whether the file name of the U disk is correct, and confirm the version information before upgrading.
